

# NON-MEDICAL SWITCHING & NEUROLOGICAL CARE

## CONSISTENTLY USING THE SAME MEDICATION

can help patients manage symptoms and limit side effects.

## THIS IS PARTICULARLY IMPORTANT FOR PATIENTS WITH MOVEMENT DISORDERS

like cervical dystonia, who are treated with a botulinum neurotoxin.

## WHILE SEVERAL BOTULINUM NEUROTOXINS ARE APPROVED

to treat dystonia, they are not interchangeable.

## STABLE PATIENTS SHOULD NOT HAVE TO SWITCH

to a different medication just to save insurers money.
